Who We Are?

ClassCompass

Our Vision

Find classes that fit your interests
Use smart filters to build schedules
Avoid time conflicts and burnout
See honest feedback from real students
Trust verified recommendations, not rumors
Register feeling informed, not stressed

Our Mission

Make class registration simple and clear
Show key details before you enroll
Highlight workload, teaching style, and pacing
Surface red flags early, avoid bad fits
Turn confusing catalogs into clear choices

Target Demographic

- Motivated but disorganized undergrads who want better grades.
- Mostly 18–24-year-old across all majors.
- Balancing classes, work, clubs, and social life.
- Sitting around B/C+ but aiming higher.
- Comfortable with apps and mobile-first tools.
- Want clear priorities, not generic study tips.
- Believe “with the right system, I’ll improve.”

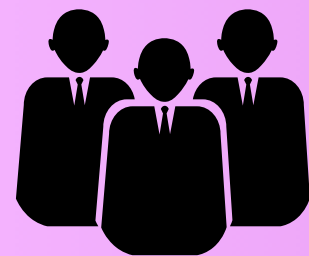

How it Works

1. Import Your Classes

Add your courses in seconds by connecting your school portal or typing them in manually. ClassCompass pulls in key details like assignments, exams, and due dates so you start with a complete picture.

2. Track Work and Grades

Log grades as you get them, or let synced classes update automatically. The app calculates your current standing in each class and fills in anything missing with clear placeholders.

3. See Your Grade Forecast

ClassCompass runs “what-if” scenarios based on your syllabus and past scores. You can see how a quiz, paper, or test will change your final grade before you even start it.

4. Get Smart Priorities

A daily list shows which tasks move your GPA the most right now. You get simple, focused nudges like “Do this first tonight” so you always know your next best move.

Financials

Non-Profit

- Puts student success ahead of profit
- Keeps the platform free for all students
- Focuses on reducing stress and academic chaos
- Serves low-income and first-generation students fairly
- Builds trust with schools and support programs
- Protects student data from being sold or exploited
- Reinvests all funding back into improving the tool
